

How Reasons Academy Works

Each week students enrolled in Reasons Academy will log onto the online learning platform and participate in threaded discussions moderated by RTB's highly trained apologists. Students have up to ten weeks to complete each half of the course.

Lessons typically include a video or audio lecture and a writing assignment in which students will demonstrate real-life application of the concepts learned.

Students enrolled in Reasons Academy will need access to an email account. For either the online or the at-home course, they'll need a computer with a high-speed Internet connection, the ability to play MP3 files, and a DVD player.

Teens Ask Questions.

Do YOU Have Answers?

REASONS ACADEMY
Reasons To Believe's Online School

Many Christian
Teens are
Leaving Home—

Without
Taking their
Faith with Them.

Science Meets Real Life

The faith of many Christian young people becomes irreparably damaged when their tough questions go unanswered. Reasons To Believe helps prevent and reverse that damage with its year-long high school program, *Good Science, Good Faith*.

This cutting-edge curriculum combines what students have learned in their science textbooks with the best biblical research. *Good Science, Good Faith* covers some of the most critical challenges to the Bible that teens will face during their college years and beyond:

How do science and Scripture fit together?

Is the big bang valid?

Did first life spring from an ancient primordial soup?

Are humans descendants of Neanderthals?

Answers to these questions demonstrate how scientific discoveries affirm the accuracy of the Bible!

Good Science, Good Faith can prepare your 11th- or 12th-grader to trust confidently in Jesus Christ as the Creator and stand strong in the faith amid the growing challenges of a secular culture.

The *Good Science, Good Faith* course is available two ways. Select the program that works best for you and your student.

🏠 At-Home Program

Oversee your child's progress at home. This includes a student workbook with step-by-step instructions, along with textbooks, audio lectures, and DVDs. An answer key and final exam are also included.

🖥️ Online Program

Enroll your student in Reasons Academy, RTB's high school distance learning program. In addition to the resources above, we will provide a highly trained apologist to oversee your student's progress and answer questions. Upon completion of the program, the Online Instructor will recommend a letter grade that can be recorded on the student's academic transcript.

All the Benefits, None of the Hassle

Let Reasons Academy take away the stress of explaining how the Bible and science fit together. This could be the most critical step you take in building a solid spiritual foundation for your child's future.
